- **Homepage**

- Left space missing on the first column of images

Still there :D

- Add an 10/20% (or whatever seems best for you) black overlay on hover so we can read the text
-

A bit less :)

The slide title "Faite glisser…" is on two line on mobile and slightly cut at the bottom, could you add a bit more space on the bottom of it and center the arrow ?
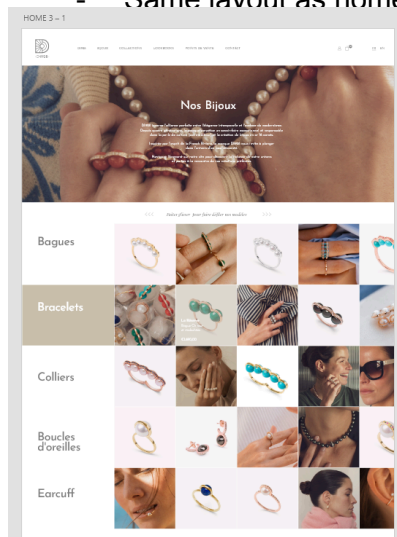

- We have more white space on the right/left than top/bottom of the images, could you make it even, top/bottom is good :
